MAINTENANCE

First, remove the sleeve from the masturbator and clean it with lukewarm water.
You can also use an **erotic cleaner**, which also helps to remove microscopic dirt.
Simply spray the product, leave it on for about 1 minute and then dry with a towel or cloth that does not leak fibers. Repeat this procedure if necessary. Clean the masturbator itself only with a lightly dampened cloth, do not immerse it in water, it could damage the electronics.

WATERPROOF

The masturbator itself **is not waterproof nor water resistant** !

LUBRICATION

Use only **water-based lubricants**. Other lubricating gels could damage the surface of the aid and it could become sticky.

DRIVE AND CHARGING

The masturbator is powered by an integrated Li-on battery, which is approximately half charged from the factory, but we recommend that you fully charge it before first use.
Charge the battery using the included USB cable, which can be plugged into a phone adapter, PC or powerbank.

STORAGE

Store separately from other erotic aids in a dry and dark place.
