PROSTATE STIMULATOR
YEQU PROSTATE

User manual

CONTROL
1) One button on the vibrator and one on the controller to control the vibrations.
2) It only takes about 2 seconds to turn on and off.
3) A short squeeze then selects the individual vibration and pulsation levels.
4) When using the remote control, the vibrator itself must always be put into operation first.

MAINTENANCE
After each use, rinse the vibrator with lukewarm water and soapy detergent.
You can also use an **erotic cleaner**, which also helps to remove microscopic dirt.
Simply spray the product, leave it on for about 1 minute and then dry with a towel or cloth that does not leak fibers.

WATERPROOF
The vibrator is **water resistant**, so maintenance is very easy.
The vibrator can be splashed with water, but you **MUST NOT immerse it in water!**
Waterproof means that you could completely submerge the product in water and enjoy water play.
Due only to the water resistance of the product, this is not possible in this case.
The remote control **is not waterproof or water resistant**.

LUBRICATION
Use only **water-based lubricants**. Other lubricating gels could damage the surface of the aid and it could become sticky.

DRIVE AND CHARGING
The vibrator is powered by an integrated Li-on battery, which is approximately half charged from the factory, but we recommend that you fully charge it before first use.
Charge the battery using the included USB cable, which can be plugged into a phone adapter, PC or powerbank. When charging, the LED flashes and when fully charged, the LED control lights up permanently.
The remote control is powered by a CR2032 battery.

STORAGE
Store separately from other erotic aids in a dry and dark place.

PACKAGING CONTENTS
In the package you will find a prostate stimulator, remote control, USB cable for charging and a CR2032 battery.

Růžový slon s. r. o.
