NOTE ON BATTERIES

European regulations require that we provide the following information:

- Batteries and rechargeable batteries must not be disposed of in household waste. As an end user, you are legally required to return used batteries. Please use official collection facilities such as the collection points provided by public waste management authorities to do so. You can also return used batteries that we carry or have carried as new batteries to us. Please contact us at care@womanizer.com. To prevent short circuits, the poles of lithium batteries should be taped before returning. For safety reasons, we ask you not to send the batteries to us by mail and refer you to the regulations for sending hazardous goods provided by mail carriers.
- If the batteries are permanently installed in the product, please do not try to remove them yourself. This may cause permanent damage to the device. Your obligations as a customer are otherwise regulated by the WEEE Directive and the national implementation law.
- Please observe the information in the manual and the safety instructions to prevent waste and littering.
- Used batteries contain harmful substances that can damage the environment or your health if they are not stored or disposed of properly. In particular, this applies to the improper handling of lithium batteries. Batteries also contain important raw materials such as iron, zinc, manganese and nickel and can be recycled. Separate collection allows these raw materials to be recycled and prevents negative impacts on the environment and human health from released pollutants.
- The sign with the crossed-out waste bin means that you must not dispose of batteries and accumulators with household waste.

If the legal requirements are present, this sign means that the following symbols and their meaning must be used when labeling the batteries:

- Hg: Battery contains more than 0.0005 percent mercury by mass
- Pb: Battery contains more than 0.004 percent lead by mass
- Cd: Battery contains more than 0.002 percent cadmium by mass

NOTES ON THE DISPOSAL OF ELECTRICAL EQUIPMENT

European regulations require that we provide the following information:

We would like to point out to owners of electrical equipment that old electrical equipment must be collected separately from municipal waste in accordance with applicable legal regulations. Batteries and accumulators that are not firmly encased in the old electrical equipment, as well as bulbs that can be removed from the equipment without being destroyed, must be separated from the old equipment in a non-destructive way before being given to a collection point for proper disposal. Please refer to the separate instructions for the disposal of batteries. The symbol of a crossed-out waste bin shown below and affixed to old electrical equipment also indicates that the equipment must be collected separately:

According to the WEEE Directive and the national implementation law, as distributors of electrical equipment, we are required to take back certain waste electrical equipment free of charge. When you purchase a new electrical and electronic device, you can surrender an old electrical device that essentially performs the same functions as the new device to us free of charge. If your old electrical equipment is not larger than 25 centimeters in any dimension, you can also surrender it to us free of charge without purchasing a new device. Please contact us at care@womanizer.com. We will then arrange the return of the old electrical equipment. For safety reasons, we would like to ask you to refrain from shipping lighting equipment (such as bulbs). Please use the collection points provided by public waste management authorities to return lighting equipment or contact us directly at the aforementioned e-mail address. You can also return old electrical equipment to any of the collection points run by the public waste disposal authorities. You are making an important contribution to the reuse, recycling and other recovery of old appliances by sending your old electrical equipment for separate collection in the proper collection groups. As the end user, you are responsible for deleting personal data from the used electrical equipment before handing it in for disposal. Please observe the information in the manual and safety instructions to prevent waste, and please check for possible repair options.

CONSIGNES RELATIVES AUX BATTERIES

La réglementation européenne nous impose de transmettre les consignes suivantes :

- Les batteries et les piles ne doivent pas être jetées avec les déchets ménagers. En tant qu'utilisateur final, vous êtes légalement tenu de restituer les batteries usagées. Pour ce faire, utilisez les points de dépôt officiels tels que les points de collecte des services publics d'élimination des déchets. Les ba-

terries usagées que nous proposons ou avons proposées à l'état neuf peuvent nous être retournées. Pour cela, vous pouvez nous contacter à cette adresse : care@womanizer.com. Pour éviter tout risque de court-circuit, les pôles des batteries lithium doivent être recouverts d'un ruban adhésif avant la restitution. Pour des raisons de sécurité, nous vous demandons de ne pas nous retourner les batteries par voie postale. À ce sujet, nous vous renvoyons aux règlements des transporteurs relatifs à l'envoi de marchandises dangereuses.

- Si les batteries sont solidement installées à l'intérieur du produit, n'essayez en aucun cas de les retirer vous-même. Cela pourrait endommager l'appareil de manière définitive. Vos obligations en tant que client relèvent par ailleurs de la directive WEEE et de sa transposition en droit national.

Les batteries contiennent également des matières premières importantes telles que le fer, le zinc, le manganèse ou le nickel qui peuvent être recyclées. Le tri sélectif permet de recycler ces matières premières et d'éviter les effets nocifs des substances toxiques libérées sur l'environnement et la santé des personnes.

Devido aos regulamentos europeus, somos obrigados a fornecer as seguintes informações:

- As baterias e acumuladores não devem ser deitados no lixo doméstico. O utilizador final é obrigado por lei a proceder à devolução das baterias usadas. Utilize os sistemas de recolha

- oficiais para este fim, como os pontos de recolha das empresas públicas de eliminação de resíduos. As baterias usadas que comercializamos ou temos comercializado como baterias novas também podem ser devolvidas a nós. Contate-nos para isso em care@womanizer.com. Para evitar curto-circuitos, os terminais das baterias de lítio devem ser colados antes de os devolver. INFORMAÇÕES SOBRE O DESCARTE DE EQUIPAMENTOS ELÉTRICOS

Devido aos regulamentos europeus, somos obrigados a fornecer as seguintes informações:

Informamos aos proprietários de equipamentos elétricos que os resíduos de equipamentos elétricos e eletrónicos (REEE) devem ser recolhidos separadamente dos resíduos municipais de acordo com as normas legais aplicáveis. As baterias e acumuladores que não estejam firmemente contidos nos REEE, bem como as lâmpadas que possam ser removidas dos REEE sem serem destruídas, devem ser separadas dos REEE sem destruição antes de serem entregues a um ponto de recolha e levadas para um ponto de eliminação designado. Para a eliminação de baterias, consulte as instruções em separado. O símbolo de um contentor de lixo com rodas barrado por uma cruz mostrado abaixo e aplicado aos REEE indica adicionalmente a obrigação de recolher separadamente:

De acordo com a diretiva REEE e a lei nacional de transposição, nós como distribuidores de equipamentos elétricos e eletrónicos somos obrigados a aceitar de volta certos resíduos sem encargos.

Ao adquirir um equipamento elétrico e eletrónico novo, pode entregar-nos gratuitamente um resíduo de equipamento que cumpre essencialmente as mesmas funções que o novo equipamento. Se o seu REEE não for maior que 25 centímetros em qualquer dimensão, também nos pode entregá-lo gratuitamente sem comprar um equipamento novo. Contate-nos para isso em care@womanizer.com. Organizaremos então a devolução do resíduo de equipamento. Por razões de segurança, solicitamos que não nos envie luminárias (como lâmpadas, por exemplo). Utilize os sistemas de recolha das autoridades públicas de gestão de resíduos para a devolução dos dispositivos de iluminação ou contate-nos diretamente no endereço de e-mail acima mencionado.
